

Golf Villa Collection
Approximately 4,091 sf

Finials and cresting accent the gabled roof of this European country home. The optional second level offers the flexibility of a spacious loft, full bath and bonus space. The Whittington II centers on a traditional gallery that leads to both the owner's and children/guest suites. Thanks to the privacy created by the gallery, the owner's suite is secluded and complete with dual walk-in closets, wet bar and a luxurious spa bath with a dramatic barrelvaulted ceiling. At the other end of the home, a pair of guest rooms – each with its own vanity and walk-in closet - share a spacious Jack and Jill Bath. Expansive windows at the back of the home create stunning sightlines through the open-concept family spaces. The home also provides the option of a finished walkout lower level, creating a potential fourth guest bedroom suite, full bath, flex-space, recreation room and wet bar.
